

MARINE POLLUTION BULLETIN

AUTHOR & SUBJECT INDEX
VOLUME 19, 1988

PERGAMON PRESS OXFORD • NEW YORK
BEIJING • FRANKFURT • SÃO PAULO • SYDNEY • TOKYO • TORONTO

MARINE POLLUTION BULLETIN

The International Journal for Marine Environmentalists, Scientists, Engineers, Administrators, Politicians and Lawyers.

The Marine Pollution Bulletin sets out to cover all aspects of the fight for life of the lakes, estuaries, seas and oceans. It includes news, comment, reviews and research reports, not only on the threat of noxious substances to marine life but also on the management and productivity of the marine environment in general. It publishes accounts of new and proposed research programmes as well as the results of those in progress.

Published monthly

Editor

Prof. R. B. Clark, Dept. of Zoology,
University, Newcastle upon Tyne
NE1 7RU, UK

News Editors

Dr P. Kingston, Institute of Offshore
Engineering, Heriot-Watt University,
Riccarton, Edinburgh EH14 4AS, UK

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A.

The item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of \$3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970. The item-fee Code for this publication is: 0025-326X/89 \$3.00 + 0.00

Permission for other use

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

Instructions to Authors

1 **Forms of contributions:** Research Reports (maximum 2500 words of text), shorter research Notes, Baseline records of contamination levels, Viewpoint articles, and Letters to the Editor are considered for publication. Submit manuscripts to the Editor, Prof. R. B. Clark (address above).

2 **Style of contribution:** Manuscripts to be in the English language with (a) Main title (not more than 2 lines printed; sub titles should be avoided), (b) author's name, affiliation, and present postal address, (c) informative summary (not more than 150 words), (d) text, (e) acknowledgements, (f) references, (g) tables, (h) captions to figures. Submit 2 copies of the manuscript on good quality white paper (or high quality xerographic copies); the manuscript should be typed with double spacing throughout and with wide margins (4 cm). All tables and figures should be numbered with Arabic numerals. In the text the word 'Figure' should be abbreviated to 'Fig.' except at the beginning of a sentence. Avoid hyphenation at end of a line. Weights and measures must be expressed in metric units according to the *Système Internationale* (non-metric equivalents, if appropriate, can be included in parentheses). All non-standard abbreviations or symbols should be defined when first mentioned.

3 **Tables:** A clear copy of tables of data should be submitted on a separate sheet and not included in the text. Very extensive tables of data are of questionable value and authors should consider more succinct ways of presenting essential information. The same data should not be presented in both tabular and graphical form.

4 **Figures:** All photographs, schemes, and drawings should be referred to as figures, numbered consecutively, and not included in the typescript. Maximum size 22 x 28 cm. On the back or margin, the author should write his name, the figure number, and the orientation of the figure. One set of figures should be of a quality suitable for reproduction (original drawings or high quality photographic reproduction; xerographic copies are not acceptable); photographs should be sharp with clear contrasts. Scales, if needed, should be shown on the drawing or photograph.

5 **References:** References should be listed at the end of the text in strict alphabetical order of authorship and year of publication. Give all authors' names, full article title, and inclusive pages. Journal titles should conform with abbreviations in the *World List*. Citations in the text should be by author and date, given in parentheses; 'et al.' is used for papers with three or more authors. Examples:

Journal: Swedmark, M., Grammo, A. & Kellberg, J. (1973). Effects of oil dispersants and oil emulsions on marine animals. *Water Res.* 7, 1649-1692.

Book: Bryan, G. W. (1976). Heavy metal contamination in the sea. In *Marine Pollution* (R. Johnston, ed), pp. 185-302. Academic Press, London.

6 **Proofs:** Unless otherwise specified, galley proofs will be sent to the first-named author for correction. Excessive alterations should be avoided. Corrected proofs should be returned to the Editor, Prof. R. B. Clark (address above).

7 **Reprints:** Reprints can be purchased at a reasonable cost, and an order form will be enclosed with the galley proofs.

8 **Content:** Although all contributions are subject to peer review, responsibility for the contents of papers rests upon the authors and not upon the editor or the publisher. It is therefore important that the contents of the manuscript are carefully considered by authors. The author must agree not to publish the same manuscript in any other journal without obtaining the consent of the editor of this journal.

WATER RESEARCH

The Journal of the International Association on Water Pollution Research and Control

Editor: **K J IVES**, Executive Editor, IAWPRC, 1 Queen Anne's Gate, London SW1H 9BT, UK

Aims and Scope

This journal publishes refereed, original research papers covering all aspects of the pollution of marine and fresh water and the management of water quality as well as water resources. It will be seen from the work published in the journal that the papers include such subjects as: the science and technology of water and wastewater treatment; studies on the effects of discharges in inland, tidal or coastal waters; the scientific aspects of the collection and treatment of municipal and industrial wastewaters; surface and ground water; non-point sources of pollution; water quality standards and the assessment of water quality by chemical, physical and biological methods; improvements in analytical and monitoring techniques; the limnology of lakes, impoundments and rivers; application of mathematical techniques in water pollution control; kinetic studies; the determination, effects and control of toxicants; the treatment and disposal of sludges; the problems of control of pollution in developing countries and the treatment of municipal and industrial wastewater in such areas. Reference to the journal will show that this list is by no means exhaustive.

A Selection of Papers

C PRAT, M VICENTE & S ESPLUGAS (Spain), Treatment of bleaching waters in the paper industry by hydrogen peroxide and ultraviolet radiation.
C N HAAS (USA), Maximum likelihood analysis of disinfection kinetics.
J G COOKE & R E WHITE (UK), The effect of prolonged exposure to acetylene on denitrification in a laboratory stream sediment system.
J J WARWICK & P SHETTY (USA), In-stream nitrification rate prediction.
E KORSHOLM & H SOGAARD (Denmark), An evaluation of direct microscopical counts and endotoxin measurements as alternatives for total plate counts.

Indexed/Abstracted in: *Current Contents*, *Chemical Abstracts*, *Current Awareness in Biological Sciences (CABS)*, *Excerpta Medica*, *EIC Intelligence*, *BIOSIS Database*, *Aqualine Abstracts*, *Geo Abs*, *PASCAL-CNRS Database*, *INSPEC*, *Petroleum Abstracts*

WATER QUALITY INTERNATIONAL

**A News Magazine of the International Association on
Water Pollution Research and Control**

**Editor: WENDY HOROBIN, IAWPRC, 1 Queen Anne's Gate,
London SW1H 9BT, UK**

Water Quality International is a quarterly news digest containing news and information from IAWPRC conferences and Specialist and Task Groups, plus general news items from around the world. Included are specific technical features, a research and development section, new products, listing of books and reports, display advertising, international conference diary and full news of IAWPRC current activities.

In addition, topics of current interest on water pollution control internationally are included.

All of this is condensed into a fast, easy-to-read style, conveying the most important new ideas, with reference to the sources, quickly and easily to busy executives, researchers and water pollution control professionals of all disciplines.

Water Quality International is not an abstracts journal. The news and feature articles on key water pollution control issues worldwide are written by experienced technical journalists.

Among the Topics Covered are:

- * Nitrogen pollution of water
- * Groundwater pollution from leachates
- * Industrial wastewater treatment
- * Waste stabilization ponds
- * Microcomputer software for water pollution control
- * Large wastewater treatment plants
- * Instrumentation
- * Control and automation
- * Marine and estuarine pollution
- * Tastes and odours

MARINE POLLUTION BULLETIN

**The International Journal for Marine Environmentalists,
Scientists, Engineers, Administrators, Politicians and Lawyers.**

1. Viewpoints

Marine Pollution Bulletin has been publishing commissioned 'Viewpoint' articles since 1977 by senior and authoritative experts in marine pollution. The Editorials and Viewpoints are important and influential features of the journal which express opinions about current events. Recent viewpoints include:

- Use of bio-indicators in monitoring conservative contaminants: programme design imperatives—D. J. H. Phillips & D. A. Segar
- Marine pollution mismanagement: towards a precautionary concept—V. Dethlefsen
- Science—a time of change?—E. I. Hamilton
- The IOC programme on marine pollution—Gunnar Kullenberg
- Mercury in the Mediterranean basin—R. Ferrara & B. Maseri
- World-wide death of corals—natural cycling events or man-made pollution—B. E. Brown
- Ecological and human health concerns in ocean disposal of wastes—Judith Capuzzo
- The modern prevalence of beach erosion—E. C. F. Bird
- Marine treatment and marine protection—The need for harmony—N. C. D. Craig & J. R. Lawrence

2. Special Issues

Marine Pollution Bulletin also publishes special topic issues from time to time, which are also available separately to non-subscribers, direct from the Publisher. Special issues published to date are:

- Vol. 19 No. 11B (1988) *Incineration at Sea and Artificial Reefs*
Edited by M. Waldichuk
- Vol. 19 No. 9 (1988) *Chesapeake & San Francisco Bays*
Edited by D. A. Wright & D. J. H. Phillips
- Vol. 18 No. 6B (1987) *Plastics in the Sea*
Edited by Douglas A. Wolfe
- Vol. 17 No. 4 (1986) *Submarine Sewer Outfalls*
by B. Quetin & M. de Rouville
- Vol. 16 No. 4 (1985) *Cellular Toxicology and Marine Pollution*
Edited by B. L. Bayne
- Vol. 15 No. 2 (1984) *Bristol Channel and Severn Estuary*
Edited by R. S. Glover
- Vol. 12 No. 6 (1981) *State of the Baltic*
Edited by G. Kullenberg
- Vol. 10 No. 10 (1979) *Pollution in the Mediterranean*
Edited by R. B. Clark
- Vol. 9 No. 11 (1978) *The Amoco Cadiz Oil Spill*
Edited by M. F. Spooner

AQUALINE ABSTRACTS

Published on behalf of the Water Research Centre

Editor: GEOFF BOTHAMLEY, Water Research Centre, Elder Way, Stevenage, Herts SG1 1TH, UK

Published since 1927, *Aqualine Abstracts* contains some 5,000 records annually on water and wastewater technology, classified under eight section headings to ensure rapid access to the information. Published every other week, each issue of *Aqualine Abstracts* provides up to 200 summaries from world-wide sources selected specially for their relevance to engineers, scientists and managers engaged in water supply and wastewater disposal. *Aqualine Abstracts* offers comprehensive coverage of all aspects of water, wastewater, associated engineering services and the aquatic environment. Over 600 periodicals, as well as books, reports and conference proceedings and other publications from water-related institutions worldwide are scanned by trained information scientists for relevant data on every aspect of the industry. In addition to the bi-weekly printed journal, the information is also available as an online database going back to 1960 and containing over 100,000 abstracts, including those published in *Aqualine Abstracts*. Also available online via Pergamon ORBIT InfoLine.

Contents

Water Resources and Supplies

Legislation. Management. Runoff. Surface water. Groundwater.

Water Quality

Eutrophication. Ecosystems. Pollutants. Drinking water. Health hazards.

Monitoring and Analysis of Water and Wastes

Microbiology. Indicator organisms. Sampling. Monitoring. Instrumentation. Chemical and physical determinations.

Water Treatment

Treatment Processes.

Underground Services and Water Use

Water distribution. Sewers and sewerage. Irrigation. Aquaculture. Water re-use.

Sewage

Sewage works. Treatment processes in sequence. Sludge treatment. Disposal.

Industrial Effluents

Organic wastes. Chemical wastes. Metal-containing wastes. Fossil fuels. Radioactive wastes.

Effects of Pollution

Seawage. Heated discharges. Metals. Pesticides. Fossil fuels. Radioactivity.
